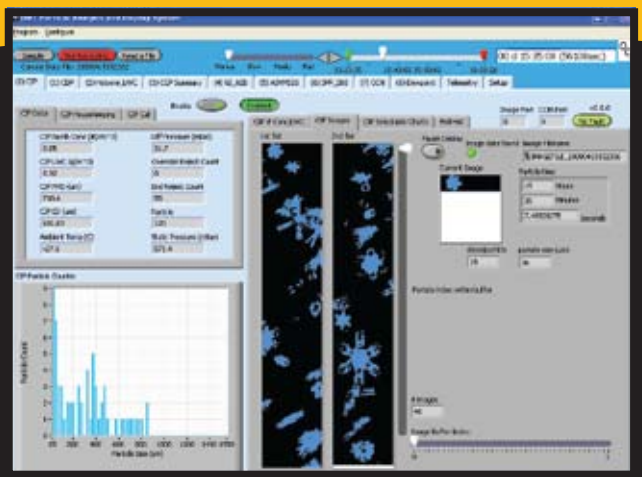
DROPLET MEASUREMENT TECHNOLOGIES

Particle Analysis and Display System (PADS)



- Flexible software for data acquisition and playback.
- Interfaces with most DMT instruments.
- Tab structure for rapid viewing of multiple instruments.
- Calculates common particle statistics such as median volume diameter (MVD) and concentration.
- Displays histograms, time-series charts, and 2-D images gathered by imaging probes.
- Runs under Windows 2000, XP, and Windows 7.
- Creates output files that can be can be easily imported into database or graphing programs for additional analysis.
- 0.1 to 10 Hz sampling rate.
- Unlimited distribution for playback.
- Supplied as a completely configured data system.
