

Aerosol Generator (Portable)

- Generate PSL, salt, carbon or other aerosols
 - Self-contained with internal air pump
 - HEPA filter for aerosol free carrier air
 - Efficient nebulizer particle generation
 - Unbreakable disposable nebulizers
 - Air flow up to 10 lpm
 - Adjustable dilution flow for aerosol stream
 - Integral carrying case for portability
 - 115V/60 Hz or 220V/50 Hz operation (specify with order)
 - Unit includes generator, power cord, manual, and four nebulizers
 - PSL standards available by special order
- This device is used to generate an aerosol stream which is needed to calibrate and troubleshoot aerosol particle spectrometers. The handy carrying-case makes this ideal for use on field projects, but will also accommodate applications in the lab. The calibration material and precision PSLs can be purchased separately.
