

HOT-WIRE LIQUID WATER SENSOR (LWC-100)

SPECIFICATIONS:

- Interchangeable circuit card sensor
- Pulse width modulation power control
- Dual coil for sensing section and end heating
- Sensor circuit for detecting end coil failure
- 2.5 inch dia. B.C. Rosemount pattern mounting
- Range 0-3 g/m³
- 25 Hz frequency response
- Signal output 0-10 V = 0-100 W
- System power 28VDC, 7.5A max
- Anti-ice power 28VDC, 8.0A
- Electronics box 400g, sensing head 550g
- System includes sensing head, electronics box (not shown), inter-connect cable, and 1-year warranty
